RESCUE TRAINING FOR EMERGENCY RESPONDERS

Hands-on exercises in a challenging, real-world environment

The Texas Engineering Extension Service offers courses designed to train Industrial and Municipal emergency response personnel to safely, efficiently and effectively perform rescues in a wide variety of emergency situations. Extensive hands-on exercises are directed toward enhancing the rescue knowledge and skills of participants. Day and night scenarios enable them to apply newly acquired skills and knowledge in a challenging, real-world environment.

Certification: All courses meet NFPA 1670, NFPA 1006 Certification and OSHA 29 CFR 1910.146.

Location: Courses are conducted at the world-renowned Brayton Fire Training Field in College Station, at the client's facility or at one of TEEX's regional training sites located throughout the United States.

RESCUE TRAINING COURSES
